LOCATION

Toronto, ON

SUMMARY

I'm a staff-level software engineer focused on shared systems that reduce complexity and make product teams faster. My recent work centers on platform architecture, design systems as infrastructure, and internal tooling that increases leverage across teams.

Experience

Staff Software Engineer

Feb 2024 - Present

KBRA

Lead cross-team initiatives across product platforms, design systems, developer tooling, and internal AI workflows. Current work spans KFI architecture, shared libraries, token systems, and technical leadership.

Senior Software Engineer

Aug 2018 - Feb 2024

KBRA

Worked across KFI applications, GraphQL APIs, search infrastructure, and design-system foundations. Helped modernize delivery, support screening infrastructure, and drive major release-time reductions.

Lead Frontend Engineer

May 2022 - May 2023

Klezma

Only frontend engineer on the team, owning frontend architecture and implementation through MVP. Led the Next.js frontend, shaped the UI system, and supported backend work as needed.

CURRENT SCOPE

KFI platform architecture and delivery systems

Design systems, token libraries, and shared UI foundations

Internal tooling, AI workflows, and developer experience

Technical mentorship, reviews, and senior-level interviewing

EDUCATION

B.S. in Energy, Business and Finance, Penn State (2015)

AWARDS

KBRA Hackathon 2019 winner

NFTHack 2022 winner

EARLIER BREADTH

Software Developer / Lead Data Scientist, Assero Services / Software Developer, Visneta / Software Engineer, Blu Mediterranean Grill / Software Engineer, Underground Vape
